## Third Party Inspection and Other Non-Sourcing Services

Nimbus offers third party inspection services. This inspection can be done at any step of the production process, from raw material to final inspection.

Nimbus' shipping services can help with scheduling shipments and consolidating your smaller less than container (LCL) shipments into full container (FCL) shipments, cutting shipping costs and saving time.

Nimbus can help you develop new products faster and cheaper, from ensuring first articles are right the first time to even basic engineering design help.

Need help communicating with your Asian sources? Nimbus has offices in Asia ready to assist you and is positioned to serve as your representative office.

### **Our services include, but are not limited to the following:**

Third Party Inspection, including raw material certification, sub-contractor inspection, in-process inspection, final inspection, ISO-type supplier audits anywhere in the world, etc.

Act as your Representative Office, including getting real answers from suppliers regarding any manner of issue, negotiating, help resolve conflicts and misunderstandings, etc.

Logistics, including local shipments, consolidation, arranging export shipping (air or sea), intermodal transport to the customer's destination, etc.

New Product Development, including coordinating first article samples, ensuring samples meet specifications before they are sent, CAD/Solidworks, etc. technical drawing, basic engineering support, packaging sourcing, sampling, and design, basic product testing, etc.

We can discuss any other need. We are creative in finding solutions to your problems.
